SUMMARY

Software Engineer building **full-stack systems** and **edge AI** solutions, with production projects spanning **RAG chatbots**, automation pipelines (n8n, Python), and real-time computer vision on **NVIDIA Jetson**. Experienced in AI-assisted development (Claude, Cursor, GitHub Copilot) and shipping features end-to-end, from design to deployment.

SKILLS

Languages: Python, C, Java, TypeScript, JavaScript, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, Supabase, Vector Databases (Pinecone)

Cloud & Tools: AWS SDK, Cloudflare R2, Vercel, Render, Git, GitHub, Docker, Linux (systemd), GStreamer, ffmpeg

AI / ML: RAG Pipelines, LLM Integration, Edge AI (NVIDIA Jetson, DeepStream), n8n, MCP Servers, AI-Assisted Development (Claude, Cursor, GitHub Copilot)

PROFESSIONAL EXPERIENCE

Freelance Software Engineer — Self-Employed (Web Development & AI Solutions) 2024 – Present

- Built and deployed AI-powered chatbots with **RAG architecture** (vector database + LLM), delivering accurate, document-grounded answers to customer questions without human intervention.
- Delivered **10+ full-stack websites** for small businesses (retail, services, real estate) using **React, Next.js, Node.js, and TypeScript**.
- Designed automation pipelines with **n8n and Python** (email workflows, AI agents, scraping, notifications), streamlining repetitive operations for non-technical clients.

PROJECTS

PoolGuard — Real-Time AI Pool Safety Surveillance System github.com/rudy002/poolguard

- Built an edge AI surveillance system detecting people near a private pool in real time (**1080p H.265 @ 25 fps**) using **NVIDIA DeepStream** (PeopleNet INT8, NvDCF tracking) on a **Jetson Orin Nano 8GB** — fully local inference, no cloud dependency.
- Engineered the full alerting logic: auto-arming alarm state machine, alerts triggered **within 3 seconds** of intrusion via **Telegram** (with remote arm/disarm commands), and automatic incident video recording (ffmpeg, RTSP).
- Deployed to production as **systemd services** with a **FastAPI REST API** and a live web monitoring interface (status, event history, remote control).

SurveyFlow — Advanced Web Survey Application (Collaborative project, 2 developers) surveyflow.co

- Developed a full-stack survey platform supporting standard and conditional surveys with dynamic question flows.
- Designed a visual, node-based editor with **React Flow** enabling non-technical users to build complex survey logic.
- Built a secure, scalable backend (**Node.js, Express, MongoDB, JWT, REST APIs**) with a responsive frontend in **Next.js, React, TypeScript**, and Tailwind CSS.

Interactive CV — AI-Powered Portfolio with Chat Interface rudy-haddad-ai.vercel.app

- Built a conversational AI portfolio (**Next.js, LLM, n8n workflows**) letting recruiters query skills and experience through a chat interface.

Studio Vision — Multilingual Real Estate Photography Platform studiovision.co.il

- Built a multilingual platform (**Next.js 15, TypeScript, Tailwind CSS**) with an interactive map (Leaflet), admin dashboard, and i18n support.
- Integrated **Cloudflare R2** (S3-compatible storage) via the AWS SDK, authentication with **NextAuth**, and deployed for a real client.

EDUCATION & CERTIFICATIONS

B.Sc. Software Engineering — Shamoon College of Engineering (SCE), Israel 2020 – 2025

NVIDIA-Certified Associate: AI Infrastructure and Operations 2026

AI Automation: Build LLM Apps & AI-Agents with n8n & APIs — Udemy 2025

MILITARY SERVICE

Sayeret Haruv (Kfir Brigade) — Combat Soldier & Reservist 2016 – 2019

- Developed strong discipline, teamwork, and decision-making under pressure in a high-responsibility combat unit.
